

Product reviews

To create a Product Review CSV file, please follow these steps:

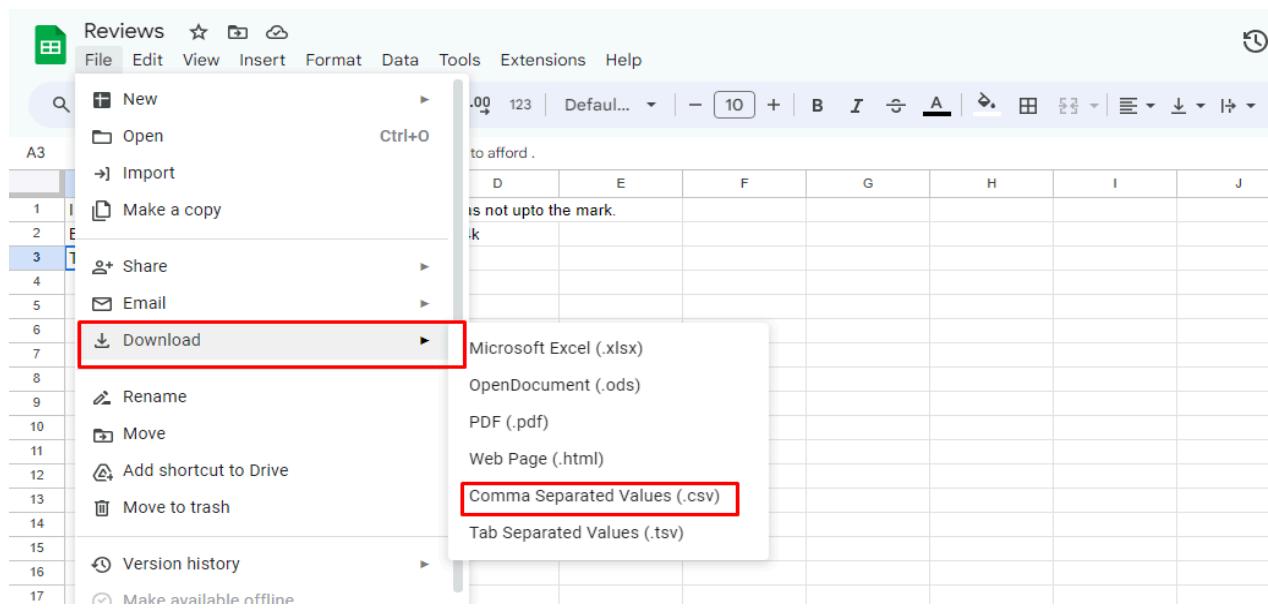

1. Open Google Sheets and click on New Spreadsheet.

2. Create Product Reviews, with each review written in a single line per sentence.

A screenshot of a Google Sheets document titled 'Reviews'. The spreadsheet has a single sheet with data in column A. Row 1 contains the text 'I just bought the product yesterday the sound quality was not upto the mark.' Row 2 contains the text 'But the picture quality was really good it also supports 4k'. Row 3 contains the text 'The price range of the product is a bit high to afford |'. The cell containing 'The price range of the product is a bit high to afford |' is selected and highlighted with a blue border. The rest of the cells in the row are empty. The spreadsheet has a standard header with file, edit, view, insert, format, data, tools, extensions, and help options. The toolbar below the header includes various icons for search, refresh, print, and other document functions.

3. Download the file in CSV format.

4. Once downloaded, upload the file to the specified path.
